

Link Resolvers Tip Sheet

Computing Reviews can link to your link resolver (e.g. SFX) to provide readers with access to the articles or books that have been reviewed. To set this up, please send us your base URL.

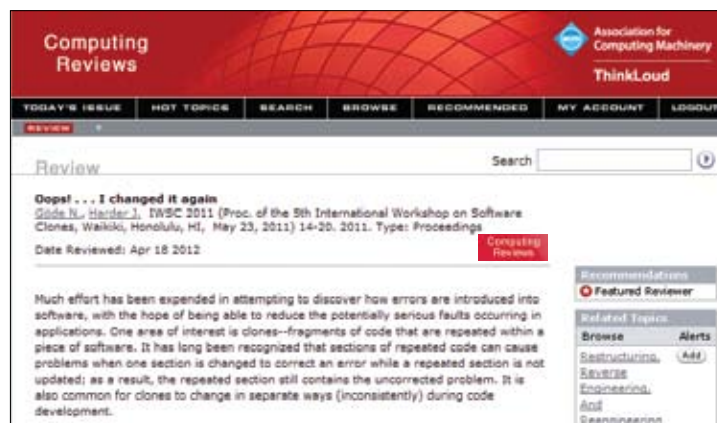

In addition, we can make use of your custom button when displaying this link. Here's how it will look:

Before...

← Review page with our default button

After...

← Review page with your custom button

Your button replaces our Full Text button on the review page. Clicking on that button will send the user to your link resolver system using the base URL you provide.

Please send base URL and image file or image URL to: service@computingreviews.com.

Tips

- The default CR Full Text button is 60 x 20 pixels. We have no size restrictions for your button but ask that you provide something of a similar size to avoid changing the page dimensions too much.
- We can only use a custom image (.gif, .jpg, or .png) – we cannot add any custom text.
